

A faint, artistic background image of a purple dragon or mythical creature. The creature is depicted in a dynamic, coiled pose, with its head raised and mouth open, showing sharp teeth. Its body is covered in detailed scales, and it has long, flowing hair or mane. The overall color scheme is a soft, ethereal purple and lavender, giving it a dreamlike or magical appearance. The creature is set against a light, hazy background that blends into the overall aesthetic of the slide.

Now, we have a coronal model  
with two parameters,  $\mathcal{L}$  and  $\mathcal{R}$ .
